

Maths

Senior Infants

Note for Parents

- For the next two weeks we will be focusing on the topics capacity and addition.
- Capacity is an ideal topic to explore outside as it is all about filling and emptying containers of water.
- Please feel free to begin with addition instead of capacity.
- We know that this is a difficult time for everyone, so we want to remind you that this is a "menu" of work and we encourage everybody to complete the work to the best of their ability.

Good morning boys 😊

We hope you all had a lovely Easter and enjoyed the sunshine and of course the chocolate!

Today we are going begin our new maths lessons, so find a place that you can do your work and we'll get started!

You will need:

- Pencil and rubber
- A copy/blank page to record your work
- Colouring pencils
- Various empty containers
(cup, eggcup, jug, jam jar, saucepan,
glass, empty milk carton, bowl, basin,
bucket, plastic bottles)
- Water (always supervise during water play)

WEEK 1

We are going to learn all about:

Capacity

Capacity is the maximum amount of liquid a container can hold

Vocabulary

Here are some words that we use when talking about capacity:

pour

fill

level

enough

full

empty

holds more

holds less

holds the
same amount

Task 1- Free Play

- Allow time for free play involving filling and emptying many different-sized and different-shaped containers.
- Ensure your son understands and is able to use terminology such as 'full', 'empty' and 'level'.
- Game: https://content.folensonline.ie/programmes/PlanetMaths/PM5I/resources/activitya/pm_si_122/index.html

Task 1 continued....

Weblink to page 117:
<http://data.cjfallon.ie/resources/19602/activity-117/index.html>

Holds most/holds least

Colour the containers that hold the most yellow. Colour the containers that hold the least pink.

a

b

c

d

e

Task 2- Think, draw and colour

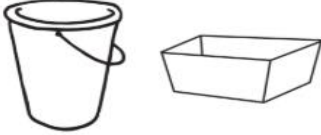

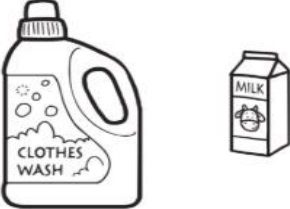

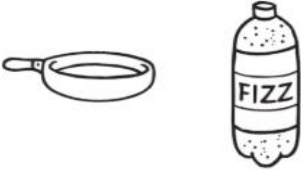

- Divide your page in half.
- On the first side draw some containers that hold more water than a jug. Colour them **blue**.
- On the second side draw some containers that hold less water than a jug. Colour them **red**.

Task 2 continued...

Weblink to page122:
<https://www.folensoonline.ie/home/library/programmes/planet-mathssi/ebook/>

Colour

Colour the container that holds the **least**, red.
Colour the container that holds the **most**, blue.

122

Strand Measures
Strand Unit Capacity

Objectives Compare and order containers according to capacity.

Task 3- Measuring using a cupfuls

*Always estimate (make a clever guess) before measuring.

Container	1. Estimation (Guess) Estimate the number of cupfuls required to fill the container	2. Result Record the number of cupfuls that were required to fill the container
Jug		
Saucepan		
Bowl		
Milk carton		
A mineral bottle		

Task 3

continued...

Questions

1. Which container holds the most?
2. Which container holds the least?
3. Can you arrange the containers in order beginning with the one that holds least and ending with the one that holds most?
4. Do any containers hold an equal amount of water?

How many cupfuls?

Estimate (guess) how many cupfuls each object holds. **Measure. Write.**

a

How many cupfuls does the bowl hold?

my estimate: about cupfuls

measure: about cupfuls

b

How many cupfuls does the teapot hold?

my estimate: about cupfuls

measure: about cupfuls

c

How many cupfuls does the bottle hold?

my estimate: about cupfuls

measure: about cupfuls

d

How many cupfuls does the pot hold?

my estimate: about cupfuls

measure: about cupfuls

Write.

The _____ holds most.

The _____ holds least.

Here is some additional work on measuring using cupfuls 😊

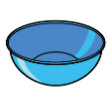

Weblink to page 118:

<http://data.cjfallon.ie/resources/19602/activity-118/index.html>

Task 4-Measuring using an eggcup

Containers	1. Estimation Estimate the number of eggcups needed to fill the container	2. Record Record the number of eggcups that were required to fill the container
cup		
Bowl 		
glass		
Plastic bottle 		
Jar 		

*Use any containers that you have at home

Task 4 continued...

1. Which container holds the **most** water?
2. Which container holds the **least** amount of water?
3. How many eggcups did it take to fill the bowl?
4. How many eggcups did it take to fill the jar?
5. Which container did you estimate would hold the most?
6. Which container does hold the most?
7. Do any of the containers hold an equal amount of water?

Challenge question: What is the total number of eggcups needed to fill all your containers?

Task 5

Investigate

Investigate

1. Choose some different-shaped containers with a similar capacity (e.g. 1-litre ice-cream carton and 1-litre mineral bottle)
2. Before starting the activity, ask your son to estimate which of the containers they think will hold the most or the least amount of water.
3. Fill 1 container with water and then pour the water from the first into the second container. What do you notice?

Questions

- (a) Does the same amount of water fit into each container?
- (b) Does a container hold more/less than the other?
- (c) Do they both hold the same amount?
- (d) Do they both have an equal capacity?
- (e) Experiment in a similar way with a variety of different shaped containers

*Additional
activities*

Monday

1. Count and write the correct number.

2. Draw 1 more star to make 6. ★★★★★

3. Count. Add. Write.

4. Write. Colour the correct number of balls.

5. Draw another set the same.

6. Colour the set that has more. (a) (b)

7. Draw a rectangle.

8. Colour 6 bananas yellow.

9. Draw 4 buttons on the shirt.

10. Colour the butterfly that has 6 spots. (b) (c)

Tuesday

1. Draw 1 more to make 5.

2. How many? □

3. Count. Add. Write.

4. Colour the 2c coin brown.

5. Colour 6 lemons.

6. Ring the suitcase that holds the most. (a) (b) (c)

7. Write the number that comes before 5. □

8. Draw more apples on the tree to make 6.

9. Start on 2. Go on 2 more. What number do you land on? □

10. Start on 1. Go on 3 more. What number do you land on? □

Wednesday

- Write the number that comes between 3 and 5.
- Draw two spots on the fish. 
- Colour the 5c coin red. 
- Colour the two sets that have the same amount.
(a)  (b)  (c) 
- Count. Add. Write.
 
 + =
- Write the missing number.

- Draw 5 spots on the butterfly. 
- Ring the odd one out.
(a)  (b)  (c)  (d) 

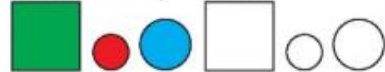

Count. Add. Write.

9. $\begin{array}{c} \bullet \bullet \bullet \\ \square \end{array} + \begin{array}{c} \bullet \bullet \\ \square \end{array} = \square$

10. $\begin{array}{c} \bullet \bullet \bullet \bullet \\ \square \end{array} + \begin{array}{c} \bullet \\ \square \end{array} = \square$

/10

Thursday

- Draw 1 more banana to make 5. 
- Write the number that comes before 3.
- Match.
day • 
night • 
- Colour 4 rabbits grey. 
- How many? 
- Finish the pattern.

- Count. Add. Write.
 
 + =
- Ring the largest triangle.
(a)  (b)  (c) 
- Colour the jar that is full green.
(a)  (b)  (c) 
- Colour the jar that is empty red.

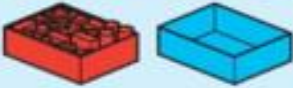

10. Colour the jar that is empty red.

/10

ity-116/index.html](http://data.cjfallon.ie/resources/19602/activity-116/index.html)

Mental maths puzzles (the answers can be checked practically)

1. If a jug hold 4 glasses of water, how many glasses would I need to fill 2 jugs?

2. A glass holds 6 eggcups of water altogether.
If I poured 4 eggcups of water into the glass how many more would I need to fill it completely?

3. A saucepan holds 5 jugs of water altogether.

- How many saucepans can I fill with 10 jugs of water?
- If I had 9 jugs of water how many saucepans can I fill completely
- Would a smaller saucepan hold more or less than 5 jugs of water?
- Would a bigger saucepan hold more or less than 5 jugs of water?

WEEK 2

This
week is
all about
addition!

Words we use
when talking
about

add

plus

more

and

increase

How many altogether?

Task 1

1. Write each sum onto your own piece of paper.
2. Take your time and make sure that you are forming your numbers correctly.

Number Line

Start on **3**. Go on **2** more. $3 + 2 = 5$

Write each sum.

Start on **6**. Go on **1** more. $6 + 1 = 7$

Start on **3**. Go on **2** more.

Start on **3**. Go on **3** more.

Start on **4**. Go on **1** more.

Start on **5**. Go on **3** more.

Start on **2**. Go on **2** more.

Start on **6**. Go on **4** more.

Start on **3**. Go on **6** more.

Strand: Number
Strand Unit: Analysis of number
Objective: Adding on the number line by counting on.

99

Task 2

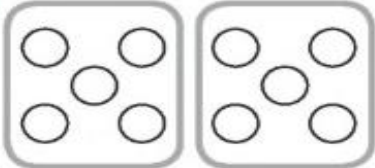

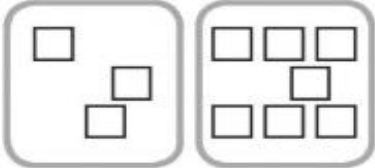

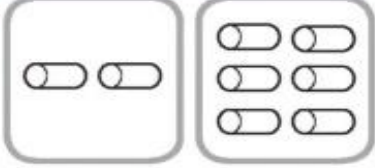

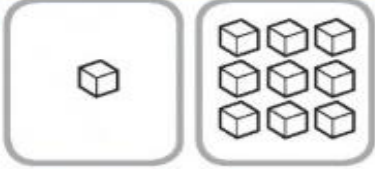

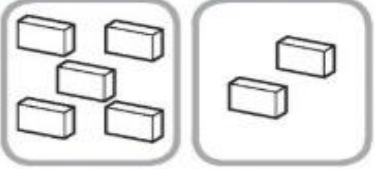

1. Count the number in each set.

2. Write and add the numbers together.

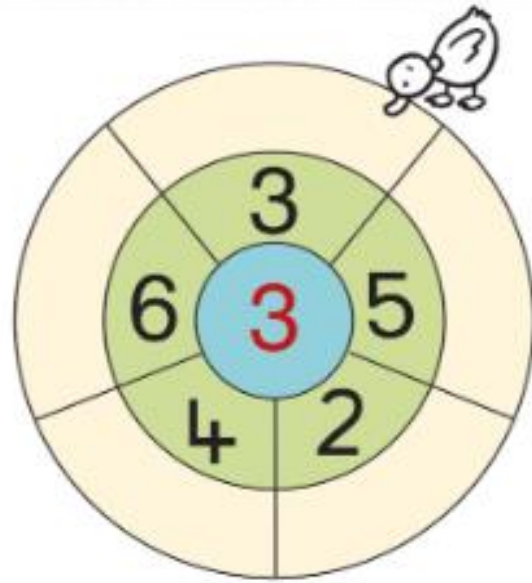

Combine (totals up to 10)

5 + 5 = 10

Count the number in each set. Add and write.

<p>a</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>	<p>b</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>
<p>c</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>	<p>d</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>
<p>e</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>	<p>f</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>
<p>g</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>	<p>h</p>  <input type="text"/> + <input type="text"/> = <input type="text"/>

Task 3-Number wheels

Add the number in the centre of the wheel to all other numbers.

Partition (totals up to 9)

Count. Add. Write.

$2 + 3 + 4 = 9$

<p>a</p> <p>$2 + 3 + 3 = \square$</p>	<p>b</p> <p>$2 + 3 + 4 = \square$</p>
<p>c</p> <p>$4 + \square + \square = \square$</p>	<p>d</p> <p>$3 + \square + \square = \square$</p>
<p>e</p> <p>$\square + 1 + \square = \square$</p>	<p>f</p> <p>$\square + 4 + \square = \square$</p>
<p>g</p> <p>$\square + \square + \square = \square$</p>	<p>h</p> <p>$\square + \square + \square = \square$</p>
<p>i</p> <p>$\square + \square + \square = \square$</p>	<p>j</p> <p>$\square + \square + \square = \square$</p>

Task 4

1. Count the number in each set.

2. Write the sum
Add the numbers together.

Task 5 - Problem solving

1. Tom and Sarah went to the shop. Tom bought 5 apples and Sarah bought 4. How many apples did they have altogether?
2. In a football match Ben scored 2 goals and his friend Mark scored 6 goals. How many goals did they score altogether?
3. If one car has 4 wheels. How many wheels do 3 cars have?
4. If there were 5 tables in Ms. Kilty's class, 4 tables in Ms. Breathnach's class and 3 tables in Ms Hennessy's class. How many tables would they have altogether?

*Additional
activities*

Monday

1. Draw a hat on each person. How many hats are there? 
2. Draw 4 flowers.
3. How many? 
4. Fill in.
1, 2, , 4, 5,
5. How many sides has a rectangle? 
6. Finish the pattern.

7. Match
in • 
under •
8.  = c
9. Colour the 5c coin yellow. 
10. Colour the tallest building green. 

Tuesday

1. Draw more stars to make 5. 
 2. How many? 
 3. Match. summer • 
winter •
 4. How many sides has a circle? 
 5. Draw 6 candles on the cake. 
 6. Fill in.
1, , , 4,
 7. Count. Add. Write.

 $4 + 2 =$
 8.  = c
- #### PET SHOP
- 
9. There are rabbits.
Colour them yellow.
 10. There are cats.
Colour them orange.

Wednesday

1. Colour the heaviest (c)
one blue. (b)

2. Draw 5 straws.

3. Ring the set that has more.

4. Colour the container that holds less. (a)

5. Ring the shapes that are not triangles.

6. Count. Add. Write.

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

7. Fill in.

1, , 3, , 5,

8. How many?

9. Count. Add. Write.

$5 + 1 = \underline{\quad}$

10.  = c

/10

Thursday

1. Write the numeral six.

2. Write the number that comes between 4 and 6.

3. Ring the container that holds more.

4. How many?

5. Ring the shapes that are not circles.

6. Count. Add. Write.

$2 + 3 = \underline{\quad}$

7. Write. Colour the correct number of ladybirds.

8. Finish the pattern.

9. Draw a  on top of the table.

10. Draw a  in the .

/10

1 2 3 4 5 6 7 8 9 10

1. $2 + 3 = \square$

$2 + 4 = \square$

$3 + 4 = \square$

$1 + 7 = \square$

4. $5 + 3 = \square$

$6 + 0 = \square$

$3 + 6 = \square$

7. $2 + 2 = \square$

$2 + 6 = \square$

$5 + 1 = \square$

$0 + 7 = \square$

2. $3 + 3 = \square$

$5 + 2 = \square$

$4 + 4 = \square$

$6 + 3 = \square$

5. $4 + 5 = \square$

$0 + 8 = \square$

$9 + 0 = \square$

8. $3 + 2 = \square$

$2 + 7 = \square$

$5 + 4 = \square$

$6 + 1 = \square$

3. $4 + 1 = \square$

$1 + 6 = \square$

$2 + 5 = \square$

$4 + 3 = \square$

6. $7 + 2 = \square$

$1 + 5 = \square$

$0 + 0 = \square$

9. $5 + 0 = \square$

$3 + 1 = \square$

$7 + 1 = \square$

$0 + 9 = \square$

10. Ring the **biggest** number in each box.

4 9 8

6 3 7

8 4 5

11. Ring the **smallest** number in each box.

5 6 2

9 5 8

6 7 9

9

1.  / 
 How many apples are there altogether? $\boxed{4} + \boxed{3} = \boxed{\quad}$

2.  / 
 How many sweets are there altogether? $\boxed{2} + \boxed{6} = \boxed{\quad}$

3.  / 
 How many sheep are there altogether? $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

4.  / 
 How many cars are there altogether? $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

5.  /  / 
 How many buns are there altogether? $\boxed{\quad} + \boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

6.  Ann has 4 sweets, Pat has 3 sweets and Paul has 2 sweets. How many sweets are there altogether? $\boxed{\quad} + \boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

7.  Susan has 2 apples, Barry has 3 apples and Joan has 5 apples. How many apples are there altogether? $\boxed{\quad} + \boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

8.  How many are there?
 (a) 4 boys and 3 boys and 1 boy $\boxed{\quad} + \boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
 (b) 2 girls and 5 girls and 3 girls $\boxed{\quad} + \boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

Well done!
You have completed
your maths tasks!
